Intermediate

ReactJS   JavaScript   Java

.NET   Oracle   Neo4j   MongoDB

SQL server

WORK EXPERIENCE

FULL-STACK DEVELOPMENT INTERNSHIP   05/2024 - 08/2024

SOFTWARE TM TECHNOLOGY CO., LTD

Industry: A company specializing in providing software solutions and technology applications to support businesses in operations and management.
Position: Full-Stack Developer
Responsibilities:
- Developed user interfaces for Zalo Mini App projects and web-based systems as per company requirements.
- Optimized UI/UX to ensure user-friendly, high-performance, and responsive interfaces.
- Integrated backend APIs with the frontend, utilizing PHP and MySQL for data exchange.
- Conducted testing and debugging to ensure product quality before deployment.
- Collaborated with the design and backend teams to deliver projects on schedule.

Achievements:
- Successfully developed and implemented the UI and core functionalities for the Zalo Mini App - Pharmacy and Vehicle Inspection & Fuel Tracking projects.
- Optimized application performance, enhancing page load speed and user experience.
- Gained extensive experience in ReactJS, Tailwind CSS, PHP, and MySQL.

PROJECT:
- **Zalo Mini App - Vehicle Inspection & Fuel Tracking**
  - **Description:** This is an application that helps businesses manage vehicle information, track maintenance status, and monitor fuel consumption. It provides intuitive data visualization to optimize operational costs and improve management efficiency.
  - **Role:** Full-Stack Developer
  - **Frontend Technologies:** ReactJS, Tailwind CSS
  - **Backend Technologies:** PHP, MySQL, Zalo Mini App SDK
  - **Team Size:** 2
  - **Results:**
    - Successfully developed and deployed the application on time.
    - Improved data rendering performance, enabling users to interact more efficiently and smoothly.
- **Zalo Mini App - Pharmacy**
  - **Description:** An application that allows pharmacies to manage product catalogs, orders, and customers on the Zalo Mini App platform. It enables users to search for medicines, place orders, and track order statuses conveniently.
  - **Role:** Full-Stack Developer
  - **Frontend Technologies:** ReactJS, Tailwind CSS
  - **Backend Technologies:** PHP, MySQL, Zalo Mini App SDK
  - **Team Size:** 2 members
  - **Results:**
    - Completed the first version with all essential features for user functionality.
    - Successfully deployed a trial version on the Zalo Mini App platform, enabling pharmacies to manage products, orders, and customers efficiently.
    - Designed an intuitive and user-friendly interface, enhancing the overall user experience.

WEB DESIGN & DEVELOPMENT INTERN   03/2023 - 12/2023

ISVN20 JOINT STOCK COMPANY

Industry: International travel and tourism
Position: Web Design & Development Intern
Responsibilities:
- Developed a Japan Travel Website using WordPress.
- Designed the website interface, optimized UI/UX, and improved page performance.
- Updated content, integrated SEO strategies, and ensured information accuracy.
- Collaborated with the team and reported progress regularly.

Achievements:
- Successfully built and launched a fully functional travel website.
- Enhanced skills in WordPress, SEO, and performance optimization.
- Gained hands-on experience in teamwork and real-world web development.

PROJECT:
- **Japan Travel Website**
  - **Description:**
    A website providing comprehensive travel information about Japan, including destinations, itineraries, costs, and tour booking services.
  - **Role:** Web Designer
  - **Technologies Used:** WordPress, Elementor SEO tools, Google Analytics
  - **Team Size:** 5 members
  - **Results:**
    - Delivered a fully functional, user-friendly website with optimized performance and fast loading speed.
    - Improved SEO rankings, increasing organic traffic and visibility.
    - Enhanced user experience (UX), making navigation smoother and more intuitive.
    - Successfully implemented responsive design, ensuring compatibility across devices.

PERSONAL PROJECT

STUDENT RENTAL HOUSING WEBSITE   10/2023 - 12/2023

Description: A platform that helps students find rental housing based on location, price, and available amenities.
Role: Team Lead & Fullstack Developer – Team of 3 members
Frontend: ReactJS, Tailwind CSS
Backend: C#, .NET Core, SQL Server
Contributions:
- Developed a website roadmap, set up the working environment, and planned the implementation process.
- Built a search feature for rental listings based on location, price, and amenities.
- Designed and implemented an SQL Server database to manage rental information.
- Created an intuitive UI, ensuring easy navigation and user-friendly experience.
- Collaborated with the team to maintain system consistency and optimize performance.
- Conducted testing, bug fixes, and feature optimization to enhance user experience.

WEDDING SERVICE WEBSITE   09/2022 - 12/2022

Description: A platform for planning and managing wedding events, allowing couples and organizers to select services, track budgets, and manage schedules efficiently.
Role: Frontend Developer – Team of 4 members
Frontend: HTML, CSS, JavaScript
Backend: C#, .NET Core, SQL Server
Contributions:
- Developed a website interface to assist couples and wedding planners in event management.
- Implemented a customizable service selection system and appointment scheduling feature.
- Integrated a secure payment gateway with automated order confirmation.
- Designed a user-friendly UI, ensuring a seamless experience for users.
- Collaborated with the team to maintain design consistency and system efficiency.
